## Triple-display productivity with true 4K UHD visuals

Integrated Intel® UHD Graphics on Chromebox 4 display videos and images in stunning 4K UHD resolution, and two HDMI ports and a USB-C® 3.2 Gen 1 port extend 4K UHD visuals to up to three displays for expanded screen size—allowing you to spread out documents, view mirrored content or extend a single browser across multiple displays for greater productivity.

## Zero-Touch Enrollment (ZTE)

Chrome OS zero-touch enrollment is an alternative to manually enrolling devices, where distributor or reseller sends instructions to Google to automatically enroll a Chrome device into a customer's domain after a device is turned on and connected to the internet. This will help customer's IT department saving their time and effort to complete the enrollment device by device.
